

DEW
The tense stand-off
of summer's end,
the touchy fuse-wire
of parched grass,
tapers of bulrush and reed,
any tree
a primed mortar of tinder,
one spark enough to trigger
a march on the moor
by ranks of flame.

lifting its thimble of drink
to the lips of a leaf,
to the stoat's tongue,
trimming a length
of barbed-wire fence
with liquid gems, here
where bog-cotton
flags its surrender
or carries its torch
for the rain.

STANZA STONES ULTRA

*Take the 50 mile journey
through the South
Pennines and visit the
famous Stanza Stones*

A tall, narrow stone monument, known as the Stanzon Stone, stands on a grassy hill. The monument is made of dark stone and has a pointed top. The hill is covered in dry, yellowish grass and scattered dark rocks. The sky is filled with white and grey clouds, with some blue visible. The overall scene is a rugged, natural landscape.

The Route

The Stanza Stones Ultra is a 50 mile/81 km linear route from Marsden to Ilkley, in Yorkshire with over 6600 feet/2020 mtrs of ascent.

You will journey through the delightful South Pennines over its wild moors and market towns. The route has 3 indoor checkpoints for essential refuelling.

Participants have 24 hours to complete the route so is available for walkers as well as runners. Cut off times however, are in place at each indoor checkpoint.

THE HISTORY

The Stanza Stones are the brain child of Poet Laureate, Simon Armitage. Born and raised in Marsden, West Yorkshire, Simon set out to create 6 poems about the theme of water and its different forms that influences life in the area. Snow, Rain, Mist, Dew, Puddle and Beck are poems carved into rocks and placed along the route. Simon was commissioned by the Ilkley Literature Festival in 2010 to write a set of site-specific poems and Pip Hall carved the poems into the stones. Each stone's location was selected with the help of local expert, Tom Lonsdale.

Leg Four

Bingley - Ilkley

16 miles/26 km 2050 feet/625mtrs

Course closes at 9am Sunday morning

The final leg is the biggy. Although not the longest, you already have 35 miles in your legs and there is no respite for 15 miles to the finish. So eat well at the Bingley Checkpoint, take on water and if need be, rest for a bit, as the final leg takes you over the last moors before Ilkley..

Be ready for a treat, though, as there are some great views from the moor, especially if you time it right for the sunset or even sunrise.

The first part gets your legs warmed up along the Leeds and Liverpool canal, passing the famous Five Rise locks, the steepest flight of locks in the UK. Leaving the canal, you climb onto the moor to visit your fourth stone, DEW, the most iconic Stanza Stone. You then head to the northern edge of the moor to pass the locally famous Swastika stone, thought to have been carved by Celtic Lingones, a tribe native to Europe in the Roman age. Puddle is the penultimate Stanza Stone before you make a short trip to the Twelve Apostles Stone Circle before you turn north to head to the finish.

Before you leave the moor, the last Stanza Stone, BECK, is visited before a short distance to the finish line at the Ben Rhydding Primary School Annex building.

Tips on finding the Stones

Snow Stone SE 03157 10767

This stone is well hidden far into a deep quarry which will be below you on the left. You need to go in as far as you can to where a jumble of rocks almost fall against it.

Dew Stone SE 07381 44954

As the path curves towards the wall, you will see the Dew Stone straight ahead taking pride of place in the wall.

Rain Stone SD 96333 19258

Remember to cross the tiny stone bridge at 96431911 otherwise you will find yourself on the wrong side of the conduit.

Puddle Stone SE 11163 45186

Take the slabbed path that heads due east towards the trig point. After about 200m you will come to a jumble of large rocks on your right. The Puddle Stones are laying flat in the ground.

Mist Stone SE 03469 32750

Cross Cold Edge Rd then access the moor at the finger post. Follow the contour path until you come to a Stanza Stones marker. Follow for a short distance to the large cairn. The Stone is just below the lip of the slope to the left of the cairn.

Beck Stone SE 12550 46815

After where the main paths cross, continue NW, keeping the stream to your left. Continue, keeping left until you find the Stanza Stones marker post. Head SW for a short distance down to the stream and there is the Beck Stone. Hit the bridge and you've gone too far!

EVENT NAVIGATION

The route is **not flagged on the ground in any way** and participants must use map reading skills (aided by their GPS device if necessary) to follow the route when required.

The organisers (and friends, family, members of the public and landowners) will be tracking participants' GPS trackers in real time. We expect participants to stay within 200m of our advised route at all times. In practical terms, for the majority of the time this is very easy as our route generally follows the only path or track on the ground: it is the only logical way. At other times, where there is no visible path on the ground, you will have flexibility to range within 200m of the route so that you should feel little pressure to follow our route precisely at all times and can enjoy the journey to the full.

We would only time-penalise or disqualify a participant for not following the route if we believe that they have gained an unfair advantage, and/or endangered themselves or others, and/or clearly passed through private property. Remember that the GPS track of each participant will be public and we will retrospectively review the route of all participants.

Participants are reminded that they are ultimately responsible for judging the safety of the route. In exceptional circumstances (due to bad weather) participants may need to deviate from the route, making their best judgement of the safest way. In these circumstances we would not penalise a participant.

ALL GPX FILES and MAP PDFs ARE AVAILABLE ON OUR WEBPAGE
